Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 50 tCO_2e by 2031. This is a reduction of 53.7%

This is aimed by rolling out all-electric fleet. This will enable us to cut down the scope one. By moving our teams to online meetings, we aim to reduce the Business Travel. This will also lower the hours worked in the office building further lowering down the scope 3 emissions.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2025 baseline. The carbon emission reduction achieved by these schemes equate to 44.81 tCO_2e, a 32%ge reduction against the 2025 baseline and the measures will be in effect when performing the contract.

This shows our commitment to achieve Net Zero. It also shows other projects which made us stay on the right track. This includes our efforts to work towards achieving ISO 14001 which would be evidence of all our hard works.

In the future we hope to implement further measures such as:

Go-Green Project: We aim to introduce all electric fleet. This will ensure the further reduction.

Myself-Zero: We have introduced inhouse awareness and training schemes to ensure staff are made aware of house to make small contributions to towards NET ZERO.
